

BERG products distribution and service – worldwide reputation

Product quality, knowledge, and reliability . . .

Over 100 dealers have been certified to sell and service BERG products – nationally and internationally. For over 30 years, BERG and its employees have been dedicated to providing the highest quality products and services available.

In addition to the Headquarters in Madison, Wisconsin, three strategically located regional offices in North America and a European office support the worldwide dealer network.

- *Beer*
- *Soda*
- *Wine*
- *Juice*

by

All-Bottle™ 1544 *Combining micro technology with proven beverage management!*

- Compact
- Modular
- Cost-effective

All-Bottle 1544 standard features:

- Uses BERG'S new FAST-POUR™ speed pourers with 15 price codes, providing for the ultimate in speed, pricing flexibility, and/or selective brand control
- Four (4) portion sizes from 1/8 to 10 ounces can be preset
- Allows four (4) price levels with unique portions in each level

The completely self-contained All-Bottle 1544 Multi-Beverage System combines 30 years of beverage system design experience with the latest in micro-electronic technology.

Free-pouring style liquor control is provided for an unlimited number of brands. Berg's new FAST-POUR™ style speed pourers offer 15 price codes for greater pricing flexibility, and/or specific brand control. Designed after the proven performance of the existing Berg price-coded pourers, *these new pourers are faster than plastic spouts.*

Electronic Cash Register (ECR) and Printer/PC interfaces help make the 1544 an even better value as a management tool by providing reports showing usage detail and sales summaries.

Other beverages, like beer, wine, soda, and juice, can also be monitored for usage reports by adding the flow meter input option along with flow meters. To limit access to dispensing, or monitor individual server sales, the ID option, with electronic keys is the ultimate in multi-beverage management tools.

Available upgrade combinations:

In addition to the All-Bottle 1544 standard features, preconfigured combinations of option modules are available:

- 1544 ID — with Server/Bartender ID
- 1544 FM — with Flow Meter Input
- 1544 DX — with Server/Bartender ID and Flow Meter Input

Printer/PC Interface - Advanced Reporting

This feature provides the ability to interface a remote printer or PC for a full range of detailed reports that can be printed in an 80-column format, hard copy form. A real-time clock provides actual dates and times on the reports.

REPORTS:

Hourly Sales Reports — showing history of pouring activity, Price Level Changes, Price/Portion, Summary "X", Detailed "X", Summary "Z", and Detailed "Z".

ECR Interface

Allows interfacing of beverage dispensing with Electronic Cash Registers to tally sales as they occur, automatically.

Server/Bartender ID

Security and accountability. When equipped, the station unit can only be "unlocked" for dispensing when an active server or bartender coded key is inserted.

The unique coded keys activate dispensing and are used to track up to fifteen (15) server/bartenders per unit — to report total sales and beverage by volume poured (including beer, wine, soda, and juice if used in combination with flowmeters).

Summary and detailed reports are then available for each server/bartender.

Flow meter Input

Allows control of up to three (3) pulse-output style flow meters — to monitor and track total sales and volume poured — including beer, wine, soda, or juice.
